

To whom it may concern,

Mr. Chenchao Liu took part at our Designit Open Inspiration event entitled “Playful Unlearning-New ways of working in healthcare” as a keynote presenter on 17th of October 2019.

The main focus of the event was to underline the importance of keeping up with all the new innovations/trends to prevent working in outdated ways in the healthcare sector. Innovation in Healthcare is one of the most essential topics Designit focuses on.

Mr. Chenchao Liu was one of the 4 speakers of the night and his presentation focused on “What can we copy from China? What Europe and China can learn from each other to deliver better patient care?”. Together with the other speakers, he created an inspirational and interactive environment.

We are glad that Mr. Chenchao Liu participated at our Designit Open Inspiration event and brought us his knowledge by observing and taking an active role in the Healthcare Industry in both China and Germany.

Mr. Chenchao reflects his knowledge to the audience in a very insightful and also engaging manner. Therefore, I recommend him as an expert presenter on cross border innovation in health for such relevant events.

Kind regards,

Marketing and Communications Manager
Aycan Lara Onur
