Letter of Recommendation for Mr Chenchao Liu

Mr. Chenchao Liu has participated at Frontiers Health held in Berlin on November 13-15, 2019.

Frontiers Health is a global event on digital health innovation with a strong focus on digital therapies, breakthrough technologies, healthcare transformation, investments and ecosystem development. It is the healthcare innovation edition of Frontiers Conferences, designing and producing international events on design and tech innovation since 2005.

Mr. Liu contributed to our conference by running the masterclass "What can we copy from China? - How European healthcare companies can succeed in China" on Nov. 13, 2019. The masterclass had the objective to provide a general overview of the health market in China and why. it represents an attractive market for foreign companies.

I am grateful for his contribution and recommend him for any similar events.

Kind Regards,

Luigi Pavia
